### **From the Chairman's Desk**

The Municipal Service Commission has come a long way since 1953 when it was first set up with the objective of recruiting group A and Group B officers for the Kolkata Municipal Corporation. Its area of operation has since been extended to include recruitment to some other categories of personnel as asked by the Kolkata Municipal Corporation from time to time. Since its inception the Commission has endeavored to select quality personnel for the Corporation to enable them in rendering services to more than 4.5 million static and another 6 million floating population.

The Commission has firmly established its reputation as a fair, impartial and efficient organization. With addition to its experience each year, it now has a well laid out system of recruitment ensuring delivery of its services in a feasible time frame.

We all at the Commission are committed to continue to improve and excel in our delivery system as is articulated in our Mission statement. The starting of our website is a step in this direction. It also complies with the requirements of the Right to Information Act 2005.

The users will find all relevant information on our website and can also revert back to us in case they need any clarifications through a suggestion box created therein.
